This section highlights a curated set of tools developed by the World Bank Group (WBG) to assist with key stages of the infrastructure and Public-Private Partnership (PPP) lifecycle. The tools are grouped into four critical categories: tools to develop and prioritize the infrastructure pipeline; tools to design and improve the PPP framework; tools to assess whether to implement a project as a PPP; and tools to design a sustainable PPP project.

In addition to the Select WBG Toolkit page, a broader collection of tools is included in the Sector-Specific and Subject-Specific sections, offering guidance tailored to the unique challenges and requirements of different sectors and thematic areas. These tools have been developed by the World Bank Group and other development partners.

Finally, you will find the Online PPP Reference Guide. The guide, a key resource since 2012, provides comprehensive resources across the PPP project life cycle, with an updated version (4.0) coming soon.
