Grain Storage PPPs

[Download](#) [Chatbot](#)

PPP projects for grain storage can be done through a variety of models depending on policy imperatives of governments and actual demand for storage. Globally, only a few projects have been successfully implemented in this sector as PPPs. There has been some recent interest in adopting this approach in countries such as India, Pakistan, Oman, Nigeria, Philippines, and Zambia. However, not all of these countries have ended up adopting the PPP mode. This section looks at some sample agreements, as well as general reference materials and lessons learnt.

Sample Agreements

[Summary of Model Concession Agreement \(MCA\) for Grain Storage Silos and Model Concession Agreement](#) - This model concession agreement has been developed by the Food Corporation of India to encourage the use of PPP in grain storage facilities.

Tools and Guidance

[Handshake Issue #5: Food & PPPs](#) - Handshake Issue #5: Food & PPPs examines how public-private partnerships (PPPs) in agriculture can help governments feed generations to come.

Projects and Case Studies

[The Role of Strategic Grain Reserves in Enhancing Food Security in Zambia and Zimbabwe](#) - Both Zambia and Zimbabwe have developed Strategic Grain Reserves (SGR) to manage food emergencies, focusing on the supply of white maize as a key crop. The study is divided into four parts: Part 1 introduces the background, objectives, methodology, and report structure; Parts 2 and 3 analyze the food security and SGR management in Zambia and Zimbabwe; and Part 4 concludes with recommendations to improve strategic grain management.

[India: Punjab Silos](#) - India has been successful in developing agriculture in its fertile northern belt, resulting in an abundance of grain. Unfortunately, its ability to store it has lagged behind. Today, India has neither the capacity nor facilities to store grain safely, leading to excessive losses through exposure, deterioration and pests. Poor inventory management has only added to the problem. In response, the Government of Punjab, India's leading agricultural state, turned to IFC to structure a pilot public-private partnership to address this issue. The resulting concession—the first of its kind in India at the state level—was awarded in May 2010.
