Let us know what you think by taking a **Quick Survey**.*

The carbon market landscape is in a state of rapid and continuous evolution, and it is crucial that countries embrace the ability to adapt and reflect the latest market developments. At the same time, alongside global market shifts, the interactions and implications at a local level also differ from country to country. While the Guidelines was developed based on insights from various sources that reflect the market standards and expectations for high-quality ERCs, it is important to note that these perspectives are dynamic.

Further Guidance for Application highlights the scope for further work needed to keep this document aligned with evolving global standards and ensure that it remains relevant to a dynamic and fast-changing carbon market landscape, as well as the aspects of the guidelines where contextual adjustments at a national level are needed. It also provides nuances to the Guidelines that may need to consider the country's context and the objectives of the exercise and use case, which could affect how the Guidelines and the process are applied. By staying abreast of the latest progressions in the market, and tailoring the use of this document to its audience and purpose, we can ensure that the document provides the most accurate, comprehensive, and relevant information to users.
