

# Medical Services

## Municipal PPP Project Summaries

Private investment is often used to deliver specialist services e.g. clinics, imaging, consultants, pharmacy or dental, but as always care needs to be taken to ensure that public services remain the core focus of the project.

Medical Services, IRI, Photo sign in front of the hospital

Private investment is often used to deliver specialist services e.g. clinics, imaging, consultants, pharmacy or dental, but as always care needs to be taken to ensure that public services remain the core focus of the project. Facility-based projects involve the project company providing construction, maintenance, and operation of a hospital or clinic, but not delivery of clinical services. In clinical projects, the project company delivers all services, including the supply of infrastructure and clinical services.

The World Bank's [Municipal Public-Private Framework Case Studies](#) includes around 100 Project Summaries with examples of commercial value capture in various sectors and from countries around the world. Below is a list of projects and project summaries which use **Medical Services** as innovative sources of funding.

To find more see [Municipal Public-Private Partnership Framework](#).

The [Guidelines on Innovative Revenues for Infrastructure \(IRI\)](#) is intended to be a living document and will be reviewed at regular intervals. They have not been prepared with any specific transaction in mind and are meant to serve only as general guidance. It is therefore critical that the Guidelines be reviewed and adapted for specific transactions.

To find more, visit the [Innovative Revenues for Infrastructure](#) section and the [Content Outline](#), or [Download the Full Report](#). For [feedback](#) on the content of this section of the website or suggestions for links or materials that could be included, please contact the Public-Private Partnership Resource Center at [ppp@worldbank.org](mailto:ppp@worldbank.org).
