

E-Commerce Service

Municipal PPP Project Summaries

E-Commerce Services, where the infrastructure creates a virtual space

Infrastructure can create a virtual space, for example by incorporating a Municipal Geographic Information System (GIS) system into the e-governance system through PPP. The Municipal GIS aims to create, store, maintain, and facilitate retrieval of property data in digital format along with geocoordinates, see example below.

The World Bank's [Municipal Public-Private Framework Case Studies](#) includes around 100 Project Summaries with examples of commercial value capture in various sectors and from countries around the world. Below is a list of projects and project summaries which use **E-Commerce Service** as innovative sources of funding.

To find more see [Municipal Public-Private Partnership Framework](#).

he [Guidelines on Innovative Revenues for Infrastructure \(IRI\)](#) is intended to be a living document and will be reviewed at regular intervals. They have not been prepared with any specific transaction in mind and are meant to serve only as general guidance. It is therefore critical that the Guidelines be reviewed and adapted for specific transactions.

To find more, visit the [Innovative Revenues for Infrastructure](#) section and the [Content Outline](#), or [Download the Full Report](#). For [feedback](#) on the content of this section of the website or suggestions for links or materials that could be included, please contact the Public-Private Partnership Resource Center at ppp@worldbank.org.
