This section provides materials on risk allocation and explores the various layers of public sector involvement and government support in PPP projects.

The PPP Reference Guide offers comprehensive guidance on each stage of developing and implementing a PPP project. It covers everything from project identification and screening, PPP development, and candidate selection, to drafting contracts and managing PPP contracts throughout the project life cycle. As an alternative approach to project origination, some governments also accept unsolicited proposals from private companies for PPP projects, as discussed in the section on Dealing with Unsolicited Proposals.

Additionally, you can explore various Risk Mitigation Mechanisms and products available in the market for project sponsors, lenders and governments. These include Guarantee and Risk Insurance Products offered by International Financial Institutions. For further insights, read the blog and the published Guidance Note on Guarantees.
