Sector Specific Toolkits

Sector Specific Toolkits: PPP Toolkits

The World Bank Group, along with other development partners, has developed a range of sector-specific toolkits to support the planning, design, and implementation of public-private partnerships (PPPs) across key infrastructure sectors.

a

On this page, you will find a collection of sector-specific toolkits designed to support the planning, development, and implementation of public-private partnership (PPP) projects across various infrastructure sectors.

You will also find the Municipal PPP Framework, a tool specifically developed to support local governments in understanding and implementing public-private partnerships (PPPs). Designed with the unique characteristics, needs, and challenges of municipalities in mind, the Framework draws on global best practices and adapts them to be practical, user-friendly, and relevant for the local context. It aims to align with the capacities and capabilities of local governments, making it easier to plan, structure, and manage PPP projects effectively at the municipal level.

These toolkits bring together practical checklists, guidelines, templates, and best practices tailored to the specific needs of sectors such as transport, energy and water. By offering targeted, sector-relevant guidance, these resources help governments and practitioners design effective, bankable, and sustainable PPP projects that address distinct sectoral challenges and align with broader development objectives.
