Global Best Practice Knowledge on Private Solutions for Public Infrastructure

Welcome to one of the most extensive repositories of know-how on infrastructure finance. It covers topics from PPP to asset recycling, from climate finance, to blended finance, from commercial value creation to limited recourse financing. Each topic is supported by reports, guidelines, case studies and sample agreements, to help users learn more about good, global practices.

Such an extensive assembly of materials from all over the world tests even the most sophisticated of organizational frameworks. Whether you're a government official, transaction advisor, investor, academic, or development practitioner, this platform is designed to provide you with the best accessibility and bespoke learning experience available, this curated compendium of know-how is supported by an AI powered intuitive ChatBot and a curriculum generator, allowing the user to define and manage their knowledge journey. These AI tools will have the option to feed only off of a dedicated large learning model (LLM) of reliable, robust infrastructure finance knowledge. By focusing on the LLM, users will encounter fewer AI hallucinations, helping those with less experience in infrastructure finance to manage AI driven knowledge more efficiently, and to improve the learning journey.
