

World Bank Group's Role in PPPs

Full Description

The World Bank Group provides support to low and middle income countries in order to develop public-private partnerships (PPPs) through a number of different tools and mechanisms. Find more at [World Bank Public Private Partnerships](#).

In addition to the PPPLRC, the World Bank Group also supports a number of knowledge management tools in collaboration with other development partners, including:

- [The PPP Knowledge Lab](#)
- [PPI Database - Private Participation in Infrastructure Database](#)
- [BoKIR - Body of Knowledge on Infrastructure Regulation](#)
- [PPIAF - Public Private Infrastructure Advisory Facility](#)

The World Bank provides financing to governments seeking to support specific projects or PPP programs through viability gap funding or financial intermediary loans. IFC has a number of financing mechanisms for supporting PPP projects, whether in their early stages through the [IFC InfraVentures](#) initiative, through lending to and equity participation in private sector operators in projects, through infrastructure funds and facilities supporting projects, and through guarantees. [IFC Advisory Services](#) advises governments on structuring PPP transactions in infrastructure and other public services. Access the [IFC](#) website for more information.

Different parts of the World Bank Group provide [Risk Mitigation Tools and Guarantees](#) to client countries. Access the [World Bank Guarantee website](#) for information about World Bank Guarantees. The International Finance Corporation (IFC) and the Multilateral Investment Guarantee Agency (MIGA) provide risk mitigation for projects also. Go to the [IFC](#) and [MIGA](#) websites for more information.
