

World Bank Group's Role in PPPs

Full Description

The World Bank Group provides support to low and middle income countries in order to develop public-private partnerships (PPPs) through a number of different tools and mechanisms. Find more at [World Bank Public Private Partnerships](#).

In addition to the PPPRC, the World Bank's Infrastructure Finance Department also supports a number of knowledge management tools in collaboration with other development partners, including:

- [PPI Database - Private Participation in Infrastructure Database](#)
- [PPP Reference Guide](#)
- [The APMG Public-Private Partnerships Certification Program](#)
- [PPIAF - Public Private Infrastructure Advisory Facility](#)
- [QII - Quality Infrastructure Investment Partnership](#)
- [GIF - Global Infrastructure Facility](#)

The World Bank provides financing to governments seeking to support specific projects or PPP programs through viability gap funding or financial intermediary loans. IFC has a number of financing mechanisms for supporting PPP projects through lending to and equity participation in private sector operators in projects, through infrastructure funds and facilities supporting projects, and through guarantees. [IFC Advisory Services](#) advises governments on structuring PPP transactions in infrastructure and other public services. Access the [IFC](#) website for more information.

Different parts of the World Bank Group provide [Risk Mitigation Tools and Guarantees](#) to client countries. Access the [World Bank Group Guarantees](#) website for information about World Bank Guarantees.
