**World Bank Group's Role in PPPs**

Full Description

The World Bank Group provides support to low and middle income countries in order to develop public-private partnerships (PPPs) through a number of different tools and mechanisms. Find more at [World Bank Public Private Partnerships](https://www.worldbank.org).

In addition to the PPPLRC, the World Bank Group also supports a number of knowledge management tools in collaboration with other development partners, including:

- **PPI Database - Private Participation in Infrastructure Database**
- **BoKIR - Body of Knowledge on Infrastructure Regulation**
- **PPIAF - Public Private Infrastructure Advisory Facility**

The World Bank provides financing to governments seeking to support specific projects or PPP programs through viability gap funding or financial intermediary loans. IFC has a number of financing mechanisms for supporting PPP projects, whether in their early stages through the [IFC InfraVentures](https://www.ifc.org) initiative, through lending to and equity participation in private sector operators in projects, through infrastructure funds and facilities supporting projects, and through guarantees. [IFC Advisory Services](https://www.ifc.org) advises governments on structuring PPP transactions in infrastructure and other public services. Access the [IFC](https://www.ifc.org) website for more information.

Different parts of the World Bank Group provide [Risk Mitigation Tools and Guarantees](https://www.worldbank.org) to client countries. Access the [World Bank Guarantee website](https://www.worldbank.org) for information about World Bank Guarantees. The International Finance Corporation (IFC) and the Multilateral Investment Guarantee Agency (MIGA) provide risk mitigation for projects also. Go to the [IFC](https://www.ifc.org) and [MIGA](https://www.miga.org) websites for more information.
