

# Agreements for Renewable Energy Projects: Power Purchase Agreements

## Full Description

A Power Purchase Agreement (PPA) specifies the contract between two parties: a) the seller, who generates electricity, and; b) the buyer, who is looking to buy electricity. It defines all the terms for the sale between the two. A PPA secures the payment stream for a Build-Own Transfer (BOT) or concession project for an independent power plant (IPP). It is between the purchaser (often a state-owned electricity utility) and a privately owned power producer.

Below are power purchase agreements developed for renewable energy projects for different energy sources, together with laws devoted to those sources, from different countries:

- [Wind Power](#)
- [Solar Power](#)
- [Hydropower](#)
- [Biomass and Biofuel](#)
- [Carbon Capture and Storage](#)
- [Geothermal](#)
