

Cote D'Ivoire – Laws and Regulations Relating to Municipal PPPs

Full Description

Decret No. 2012-1151 - Ivory Coast has passed a cross-cutting decree in 2012 to regulate PPPs - and retained a large definition of the latter. It includes various types of PPPs - from the concession, lease and management (under the civil law notion of «*délégation de service public*») to BOT and its variances to PFI-type of contracts (whereby the private party is paid by the public party for the investment but does not bear the commercial risk) - to joint ventures between a public and a private party. The decree also refers to «*collectivités territoriales*» (which include municipalities) and provides for the establishment of several institutions to assist public parties in the conclusion of PPPs. Competencies of the municipalities are defined in a law of 2003 and a series of subsequent decrees. Loi 203-208 (...) provides that waste management, transport, hydraulic and sanitation, among others, are competencies of the municipalities.
