**Article 25**

Representative of contracting authority who has in any way participated in public procurement procedures or persons related with him or her, where total value of contracts awarded in these procedures to a specific supplier within the last year prior to termination of his or her office or employment exceeded 5% of total value of all contracts that this contracting authority has concluded over that period, within the next two years after termination of office or employment with this contracting authority, may not:

1) sign employment contract, service contract, or in any other way be professionally engaged with this supplier or persons related with this supplier;

2) receive from this supplier or persons related with this supplier, directly or indirectly, any pecuniary remuneration or any other benefit;

3) acquire a share or stocks of this supplier or persons related with this supplier.

In case of breach of prohibition under Paragraph 1 of this Article, contracting authority is obliged to notify thereon the governmental body authorized to fight corruption and the competent prosecutorial office.
**Declaration of Independent Bid**

**Article 26**

Contracting authority has to foresee a declaration of an independent bid as a part of tender documents.

In declaration of an independent bid, bidder confirms under full financial and criminal responsibility that the bid was submitted independently, without any agreement with other bidders or interested parties.

Declaration under Paragraph 2 of this Article has to be made separately for each individual public procurement procedure.

**Duty to report Competition Foul**

**Article 27**

In case of reasonable doubt in veracity of declaration of independent bid, contracting authority shall immediately notify thereon the organization in charge of the protection of competition.

Each interested person or person employed or in any other way working with an interested person, is obliged to notify the organization for the protection of competition, if they are aware of any information on violation of competition in public procurement procedure.

Person under Paragraph 2 of this Article may not get employment or other type of contract rescinded, nor be transferred to another position just because he or she, acting conscientiously and in good faith, has reported violation of competition in public procurement.

**In the cases under Paragraphs 1 and 2 of this Article, contracting authority may continue the public procurement procedure, under proviso that the contract, if awarded to the bidder suspected of violating competition, will be rescinded by virtue of law where the organization in charge of the protection of competition determines actual violation of competition.*

**Civil Supervisor**

**Article 28**

Where contracting authority conducts public procurement with estimated value exceeding RSD 1 billion, the procedure shall be monitored by civil supervisor.

Persons eligible to be appointed for civil supervisors are prominent experts in the domain of public procurement or in areas related to subject of public procurement.
Also eligible for civil supervisors are associations dealing with public procurements, prevention of corruption, or prevention of conflicts of interests.

Persons not eligible to be appointed for civil supervisors are persons employed or otherwise commissioned to work for contracting authority, or persons related with contracting authority, or persons who are members of a political organization.

Requirements and criteria for appointment and the manner of work of civil supervisor shall be regulated in detail by the Public Procurement Office.

Civil supervisor shall be appointed by the Public Procurement Office, not later than the day set in annual public procurement plan as tentative day to initiate public procurement procedure, i.e., within 30 days from the day of endorsement of public procurement plan.

Contracting authority may not initiate public procurement procedure before the appointment of civil supervisor.

Civil supervisor shall supervise public procurement procedure and, to this end, shall have permanent insight into procedure, documents and communication between contracting authority and interested parties, i.e., the bidders.

Civil supervisor shall file report on conducted public procurement procedure to the committee of the National Assembly in charge of finances or to the assembly of autonomous province or local self-government, and to the Public Procurement Office, within 20 days from the day of concluded contract or of decision on canceling procurement.

Civil supervisor has no right to remuneration for his or her work.

2. Prevention of Conflict of Interest

Conflict of Interest

Article 29

Conflict of interests for the purpose of this Law exists where relation between contracting authority and bidder may impact impartiality of contracting authority in making decision in public procurement procedure, namely:

1) if contracting authority’s representative or with him or her related person is involved in bidders’ management;

2) if contracting authority’s representative or with him or her related person owns more than 1% of bidder’s share or stocks;
3) if contracting authority’s representative or with him or her related person is employed or working with bidder or has business relationship with the bidder.

Prohibition on Awarding Contract

Article 30

Contracting authority may not award public procurement contract to bidder in case of existing conflict of interest, where the existence of such conflict of interests affected or could affect the decision making in the public procurement procedure.*

Person involved in conflict of interest may not be a subcontractor for the bidder to whom was awarded contract, or a member of the group of bidders to whom was awarded contract.

The Republic Commission for the Protection of Rights in Public Procurement Procedures at the request of contracting authority will approve the concluding of contract under Paragraph 1 of this Article, provided that contracting authority demonstrates that prohibition to conclude contract would cause great difficulties in work or business of contracting authority disproportionate to the value of public procurement, or that it would substantially undermine the interests of the Republic of Serbia, that it has taken all measures to prevent adverse impacts, that other bidders do not meet requirements of the procedure, or that, after the ranking of their bids, the difference in prices is 10% higher or that the number of weights is higher by ten in favor of the selected bidder.

Decision under Paragraph 3 of this Article shall be published on websites of contracting authority of the Republic Commission for the Protection of Rights in Public Procurement Procedures, and also posted on Public Procurement Portal.

III. CONDITIONS AND MANNER OF CONDUCTING PUBLIC PROCUREMENT PROCEDURE

1. Public Procurement Procedure

Types of procedure

Article 31

Public procurement procedures are as follows:

1) open procedure;

2) restricted procedure;

3) qualification procedure;
4) negotiated procedure with invitation to bid;
5) negotiated procedure without invitation to bid;
6) competitive dialogue;
7) design contest;
8) low-value public procurement procedure.

Contract is awarded in open procedure or in restrictive procedure.

Contract may also be awarded in other public procurement procedures, provided that the requirements prescribed for that by this Law are met.

Open Procedure

Article 32

Open procedure is procedure wherein all interested persons may submit bids.

Restricted Procedure

Article 33

Restricted procedure is procedure conducted in two phases and wherein all interested persons may submit bids.

In the first phase, contracting authority invites all interested parties to submit applications and recognizes qualifications to applicants whom it finds to meet previously set requirements for qualifications.

After having recognized qualifications, contracting authority publishes notice from Annex Đ of this Law.

In the second phase of restricted procedure, contracting authority invites all applicants with recognized qualifications (candidates) to submit bids.

Contracting authority may initiate second phase of restricted procedure provided it has at least three candidates.

Contracting authority shall initiate second phase of restricted procedure within no more than six months of the final decision on recognizing qualifications.
Qualification procedure

Article 34

Contracting authority may conduct qualification procedure where it is not possible to foresee public procurement beforehand from the aspect of volume, quantity and time, and the subjects of such procurement are occasional services or consumables, or occasional repairs or works in regular maintenance, to be delivered or performed according to the standard and usual specifications rather than according to some specific specifications of contracting authority.

In qualification procedure, contracting authority invites all interested persons to submit bids and recognizes qualification to applicants whom it finds to meet previously set requirements for qualifications.

Within the deadline set in invitation to apply, contracting authority makes decision on recognizing qualifications that contains a list of at least 5 candidates and the period of validity of recognized qualifications, which may last up to 3 years, and the reasoning of the decision must state the reasons for rejection of other applications.

Contracting authority shall post on the Public Procurement Portal and on its website* decision referred to in Paragraph 3 of this Article within three days from the day of making it.

Contracting authority shall update the list of candidates every six months by recognizing qualifications to each applicant who fulfills requirements and who has in the meantime submitted application for qualification recognition.

Contracting authority shall post invitation to apply in qualification procedure including requirements for recognizing qualifications and tender documents on the Public Procurement Portal and on its website, so that they are available to all interested parties during the entire period of validity of the list of candidates.

Contracting authority will exclude candidate from the list of candidates where it ceases to meet requirement for qualification recognition*, and will make a decision thereon which will contain in its reasoning the reasons for exclusion of candidate, and has to deliver it to all candidates and post it on the Public Procurement Portal and on its website* within three days from the day of making that decision.

During the period of validity of the list of candidates, contracting authority invites all candidates from the list to submit the bids, and at the same time it posts its invitation at the Public Procurement Portal and on its website*.

At the moment of sending invitation to submit bids, the list of candidates must contain at least five candidates.

* Official Gazette of the RS, No. 68/2015

Negotiated procedure with invitation to bid
Contracting authority may conduct negotiated procedure with invitation to bid:

1) where in open procedure, restricted procedure, or qualification procedure, or in competitive dialogue, all bids received were unacceptable, provided that the originally defined requirements for participation in the procedure, technical specifications and criteria for awarding the contract or framework agreement* are not altered. If contracting authority decides to invite to negotiated procedure only and all bidders that participated in open procedure, restricted procedure or qualification procedure, or in competitive dialogue, to supplement their bids so to make them acceptable, it does not have to publish invitation to bid. The price offered in this negotiated procedure may not be higher than the price offered in open or restricted or qualification procedure, or in the competitive dialogue;

2) in exceptional cases where, due to the nature of goods, services or works, as well as the related risks, it is not possible to estimate the public procurement value in advance;

3) in the cases of public procurement of services, if the nature of these services is such that their specifications may not be sufficiently precisely determined so to facilitate conducting of open or restricted procedure and there are no conditions to conduct competitive dialogue.

In the case under Paragraph 1, Point 2) of this Article do not apply the provisions of this Law governing the estimated value.*

Contracting authority may conduct negotiated procedure in several phases, so to reduce the number of bids which require negotiating by means of applying requirements, specifications and criteria determined in the call for competition and tender documents.

In its tender documents contracting authority shall define the contractual elements to be negotiated, the manner of negotiation and information that the minutes in negotiations will be taken.

Contracting authority shall ensure in the course of negotiated procedure that the contracted price does not exceed the comparable market price, and check the quality of public procurement subject with due diligence.

* Official Gazette of the RS, No. 68/2015

Negotiated procedure without invitation to bid

Article 36

Contracting authority may conduct negotiated procedure without invitation to bid:

1) if it did not receive any bid or application in open or restricted procedure, or if all bids were inadequate, provided that the originally defined subject of public procurement and
conditions for participation in the procedure, technical specifications and criteria for awarding the contract or framework agreement* are not altered;

2) if, due to technical or artistic reasons related to public procurement subject, or for reasons related to the protection of exclusive rights, the procurement may be executed only by a particular bidder;

3) if, for reasons of extreme urgency brought about by extraordinary circumstances or unforeseen events, whose appearance in no case depends on its will, contracting authority was not able to observe time limits laid down for open or restricted procedure. The circumstances which justify such urgency may not be in any relation with contracting authority;

4) for additional deliveries by the original supplier intended as a partial replacement of products, materials or installations, or as an extension of volume of the existing products, materials or installations, where a change of supplier or provider of services would oblige the contracting authority to procure material having different technical characteristics which, in turn, would result in disproportionate technical difficulties in operation and maintenance, where total value of all additional deliveries may not exceed 15% of total value of the originally awarded contract* and provided that there lapsed no more than three* years since the originally awarded contract;

5) in case of additional works or services not included in the original project or the first public procurement contract, which, due to unforeseeable circumstances, have become necessary for implementing public procurement contract, on conditions: that the contract is concluded with the original service provider, that the total value of all additional services or works (unforeseen works) does not exceed 15% of total value of the originally awarded contract*, that there lapsed no more than three* years since the originally awarded contract, as well as that:

   (1) such additional services or works may not be technically or economically separated from the first public procurement contract without causing disproportionate technical difficulties or disproportionately high costs to the contracting authority, or

   (2) such services or works, which contracting authority could procure separately from the performance of the original contract, are necessary in order to complete the original public procurement contract;

6) for purchases of goods under particularly advantageous conditions from a supplier going through liquidation, apart from involuntary liquidation or bankruptcy,* in accordance with legislation governing company liquidation and bankruptcy*;

7) in case of public procurement of goods offered and purchased in commodity exchange;

8) in case of public procurement of services that are part of the follow-up to a design contest organized in accordance with this Law, if the contract was awarded to the winner or the winners of that contest, and if contracting authority involves each of the winners in negotiations;
Prior to initiating negotiated procedure under Paragraph 1, points 2) through 6) of this Article, contracting authority shall request opinion of the Public Procurement Office on the justifiability of applying the negotiated procedure.

The Public Procurement Office shall set forth the form and the contents of request under Paragraph 2 of this Article.

Within ten days from the reception of completed request under Paragraph 4 of this Article, the Public Procurement Office is obliged to scrutinize the basis for applying negotiation procedure and, in the course of scrutiny, it can demand from contracting authority additional information and data necessary for establishing facts relevant for making the opinion.

The Public Procurement Office shall publish its opinion under Paragraph 4 of this Article on the Public Procurement Portal.

Scrutinizing the basis for applying negotiation procedure suspends further activities of contracting authority in the procedure, except in case of negotiated procedure under Paragraph 1, Point 3) of this Article even where opinion is not delivered or published within the deadline under Paragraph 4 of this Article.

**Upon making decision on initiating negotiated procedure, contracting authority is obliged to send invitations to bid and to simultaneously publish the notice on initiating this procedure which will contain data from Annex 3E and tender documents.**

Contracting authority shall, whenever it is possible, ensure competition by inviting several persons to participate in the procedure, and ensure that the contracted price does not exceed the comparable market price, and check the quality of public procurement subject with due diligence.

Contracting authority shall define in tender documents the contractual elements to be negotiated and the manner of negotiation, and to take the minutes of the negotiations.

The Public Procurement Office shall draft instruction on types and manner of negotiations.

*Previous Paragraphs 11-13 are deleted (see Article 14 of the Law – 68/2015-4)*

* Official Gazette of the RS, No. 68/2015

**Competitive dialogue**

**Article 37**

Contracting authority may conduct competitive dialogue in cases where public procurement subject is particularly complex, so that public procurement contract may not be awarded through open or restricted procedures.

Subject of public procurement shall be considered particularly complex if contracting authority is objectively not able to determine:
1) technical specifications of public procurement subject;

2) legal or economic structure of public procurement.

Contracting authority invites all interested parties to submit applications and recognizes qualification to applicants based on the previously set requirements.

The decision on recognizing qualification shall contain explanation which states the reasons for rejecting other applications, and contracting authority posts it on the Public Procurement Portal and on its website.*

In order to preserve competition, contracting authority may decide to keep data on candidates as business secret, and in that case, instead of decision under Paragraph 5* of this Article, it delivers separate notifications to applicants.

Contracting authority conducts dialogue with all applicants with recognized qualification (candidates) in order to find the solution which would meet its needs.

During the course of entire procedure, and especially in the dialogue phase, contracting authority shall ensure equal treatment to bidders, in particular by making sure not to provide to some individual bidders such information that could result in disadvantage of other bidders.

Contracting authority conducts dialogue until it identifies the solution(s) capable of meeting its needs.

Contracting authority conducts dialogue with a candidate only about the solution offered by that candidate.

Contracting authority may not disclose to candidates solutions offered by other candidates, or any other information concerning solutions offered by other candidates.

Contracting authorities can stipulate in the call for competition and tender documents that the procedure will be conducted in several phases in order to decrease the number of solutions to be discussed through dialogues.

In the case under Paragraph 12* of this Article, the number of candidates in the dialogue phase may not be less than three, unless a lower number of interested parties apply.

Contracting authority is obliged to deliver a reasoned decision to candidates excluded from the dialogue.

After contracting authority identifies the solution(s) capable of meeting its needs, it will invite all candidates not excluded from dialogue to submit their final bids based on one or more adopted solutions presented during the dialogue.

Decision on awarding contract in competitive dialogue shall be made by applying the criterion of the economically most advantageous bid.

Elements of the criterion shall be determined in tender documents before the dialogue phase.

*Previous Paragraphs 17, 18, and 19 are deleted (see Article 4 of the Law – 68/2015-4)
Design Contest

Article 38

Contracting authority conducts design contest in the fields of urban planning, architecture, construction, engineering, and data processing.

Contracting authority conducts design contest by applying the rules for open procedure or restricted procedure, unless otherwise provided for by this Article.

Contracting authority publishes call for competition in design contest, as prescribed for publishing contract notice and in accordance with Annex 3D.

The right to participate in tender may not be limited:

1) to a specific geographic area or a part of it;
2) on the grounds of requirement that participants may only be legal or physical persons.

Design contest may be organized:

1) as a procedure that precedes the awarding of public procurement contract;
2) as a procedure to disburse remuneration to participants.

In the case under Paragraph 5, Point 1) of this Article, the estimated value of public procurement is based on the estimated value of public procurement of services including possible remunerations or compensation to participants.

In the case under Paragraph 5, Point 2) of this Article, the estimated value of public procurement is based on the aggregate value of remunerations or compensation to participants including the estimated value of public procurement of services that could be subsequently awarded in negotiated procedure under Article 36, Paragraph 1, Point 8) of this Law, where contracting authority in its call for competition in design contest did not exclude this option.

Design, plan or project shall be selected by an independent jury.

Members of this jury are only physical persons who are not in conflict of interest in terms of Article 29 of this Law.

Where contracting authority requests participants in the contest to possess particular professional qualifications or experience, no less than a third of members of the jury must have at least the same qualifications or experience.

The jury is autonomous in deciding, and considers anonymous designs, plans, or projects solely according to the criteria set in the call for competition and tender documents.

The jury compiles report on evaluation of design, plan or project, signed by all members of jury.

Anonymity must be observed until the jury makes its decision, or until the report is compiled.
After the report is compiled, participants may be invited to clarify some parts of designs, plans or projects. In that case, minutes are taken on the conversation between the members of the jury and participants.

After having conducted the procedure, contracting authority publishes report on the outcome of the contest in compliance with Annex 3J.

Low-Value Public Procurement Procedure

Article 39

Low-value public procurement, in terms of this Law, is procurement with estimated value lower than RSD 5,000,000, and where the total estimated values of the same-kind procurements at the annual level, is lower than RSD 5,000,000.*

In procurements with estimated value not exceeding RSD 500,000, and where neither the total estimated value of the same-kind procurements at the annual level exceeds RSD 5,000, contracting authorities are not obliged to apply the provisions of this Law.*

When conducting procurement under Paragraph 2 of this Article, contracting authority has to prevent any conflict of interest, to ensure competition, and to make sure that the contracted price does not exceed comparable market price.

Public procurement procedure is conducted by public procurement officer, or person performing public procurement tasks, unless the complexity of public procurement subject demands involvement of other competent persons.

In low-value public procurement, contracting authority may invite at least three persons who are, according to its knowledge, capable of delivering the procurement, to submit their bids, and at the same time publish the invitation to bid on the Public Procurement Portal and on its website.*

In an individual low-value public procurement procedure whose value does not exceed the amount under Paragraph 2 of this Article, instead of concluding public procurement contract, contracting authority may issue a purchase order to the most advantageous bidder if the order contains essential elements of the contract.

* Official Gazette of the RS, No. 68/2015

Article 39a*

The provisions of this Law governing the low-value public procurements may apply to procurements of services under Annex 2, regardless of the estimated value of public procurement.*

* Official Gazette of the RS, No. 68/2015
2. Special Forms of Public Procurement Procedure

*Framework Agreement*

Article 40*

Contracting authority may conclude framework agreement after having conducted public procurement procedure under Article 31 of this Law.*

Framework agreement is concluded with one or more bidders, and contracting authority has to specify the number of bidders for concluding framework agreement in its invitation to submit bids or applications.*

Where contracting authority does not receive beforehand a certain number of acceptable bids, it may conclude framework agreement with a lesser number of bidders, and even with only one.*

Framework agreement may not last more than three years, and where it is concluded with only one bidder it may not last more than two years.*

Framework agreements may only be used by contracting authorities precisely named in framework agreement, or by those whose identity may clearly be inferred from the wording thereof.*

Public procurement contracts concluded on the basis of framework agreement must be awarded before the expiration of the duration of given framework agreement; however, the duration of individual contracts concluded on the basis of framework agreement does not necessarily have to correspond to the duration of that framework agreement, and instead they may last shorter or longer, as necessary.*

Framework agreement may not be used in a way that would be preventing, restricting, or distorting competition and equality of bidders.*

When concluding a public procurement contract on the basis of framework agreement, contracting parties are not allowed to alter any key requirement under the framework agreement.*

Instead of a public procurement contract, on the basis of framework agreement may also be issued a purchase order provided that it contains key elements of the contract.*

The Public Procurement Office shall draft templates and instruction on the manner of concluding framework agreements.*

* Official Gazette of the RS, No. 68/2015

*Concluding Public Procurement Contract on the Basis of Framework Agreement*
Article 40a

Where framework agreement is concluded with a single supplier, the contract will be awarded on the grounds of requirements stipulated by the framework agreement and the bid submitted in the public procurement procedure in which was concluded this framework agreement.

Where framework agreement is concluded with several suppliers, the public procurement contract based on framework agreement may be awarded on one of the following ways:

1) pursuant to the requirements for awarding contract set under the framework agreement, on the basis of bids previously submitted by bidders, without reopening competition among suppliers;

2) by means of reopening competition among suppliers, where the framework agreement does not determine all requirements for awarding contract.

In the case under paragraph 3, Point 2) of this Article, contracting authority is obliged to:

(1) send invitation to submit bids to all suppliers with whom it has concluded framework agreement;

(2) foresee an adequate deadline for submission of bids;

(3) ensure that bids remain unopened until expiry of deadline for the submission of bids;

(4) make decision on awarding contract to the supplier which submitted the most advantageous bid pursuant to criteria set in tender documentation for framework agreement.

In the case under Paragraph 3 of this Article, contracting authority will post the decision on awarding contract on the Public Procurement Portal and on its own website.

In the case under Paragraph 3, Point 2) of this Article, contracting authority may also use electronic auction.

Dynamic Procurement System

Article 41

Contracting authority shall establish dynamic procurement system using only electronic means and applying the rules for open procedure, unless specified otherwise in this Article.

Electronic means and information system or information technology used to establish and run a dynamic procurement system, must be widely accessible to interested parties and may not result in the limiting of competition.

Contracting authority shall publish invitation to bid, thereby inviting all interested parties to submit their initial bids.
Technical specifications of public procurement subject must be precisely specified, so that bidders are able to submit adequate bids.

Invitation to bid shall be valid during the entire period of dynamic procurement system and an interested party can, at any moment, submit initial bid thus requesting to be admitted into the system.

If a bidders’ bid is evaluated as acceptable, this bidder shall be admitted into the dynamic procurement system.

Contracting authority is obliged, within 15 days from the day of reception of initial bid, to evaluate it and decide whether to admit the bidder into the dynamic procurement system.

During the existence of dynamic procurement system, bidders admitted into the system can improve or amend their initial bids, providing that they observe all technical specifications set by contracting authority.

Prior to awarding each separate public procurement contract, contracting authority shall publish, on the Public Procurement Portal and on its website, a notice of dynamic procurement system’s existence, thereby also inviting all interested parties to submit initial bid and involve into dynamic procurement system.

Where, after publishing notice under Paragraph 9 of this Article, contracting authority receives initial bid, it is obliged to evaluate initial bid before inviting members of dynamic procurement system to submit final bids.

The most advantageous bid shall be chosen by applying criteria set in the invitation to bid under Paragraph 3 of this Article, but these need to be such to enable automatic evaluation and ranking of bids by electronic means.

Dynamic procurement system may not last longer than four years, and during the validity period of this system, contracting authority may not change terms for admission into the system.

Contracting authority may not condition the submission of initial bids or the admission into the dynamic procurement system by paying fees, deposits, etc.

3. Electronic Auction

Requirements for applying electronic auction

Article 42

Contracting authority shall apply electronic auction where a public procurement subject can be clearly and objectively described.

Electronic means and information system and technology used to apply electronic auction have to be widely accessible to interested parties and may not result in restriction of competition.
Contracting authority can conduct electronic auction in open, restricted or negotiated procedure under Article 35, Paragraph 1, Point 1) of this Law.

Contracting authority may conduct electronic auction for submission of bids for public procurement contract based on the concluded framework agreement.

Electronic auction may only be conducted concerning the criterion or elements of the criterion which can be quantified in a clear and comprehensible manner, so that it is possible to present them in numbers or percent, namely, so to make them suitable for automatic evaluation by electronic means, without any type of intervention from contracting authority.

**Manner of Application of Electronic Auction**

**Article 44**

Contracting authority shall explicitly state in its call for competition that electronic auction is going to be conducted.

Contracting authority is obliged to specify in tender documents:

1) criterion or elements of the criterion which is/are the subject of electronic auction;

2) limits within which may or must be altered the values of bids concerning the criterion or elements of the criterion;

3) conditions under which bidders can alter bids;

4) data available to bidders during electronic auction, or when these will be available;

5) manner of conducting electronic auction;

6) equipment used to conduct electronic auction and technical specifications necessary to connect to the IT system of contracting authority.

Before the start of electronic auction, contracting authority performs expert evaluation of bids, by applying the criterion and all elements of the criterion specified in the invitation to bid and the tender documents.

The proofs of fulfilling eligibility requirements that may not be sent electronically, contracting authority shall deliver in paper copy before the expiry of deadline for the submission of bids.

Invitation to bid shall be sent electronically simultaneously to all bidders which, based on the previous expert evaluation of bids, were determined to have submitted acceptable bids.

Invitation to bid shall contain:

1) data relevant for using the IT system of contracting authority;
2) date and hour of the beginning of electronic auction;

3) results of the previous expert evaluation of bids;

4) mathematical formula to be applied in electronic auction, which enables automatic setting of changes in the process of ranking the bids according to newly offered prices, and to other elements of the criterion (hereinafter: mathematical formula).

Mathematical formula must contain weighting points for all elements of the criterion which contracting authority set in the invitation to bid and the tender documents, adjusted for evaluation of altered values of the parts of a bid.

Where bid variants are allowed, for each variant a special mathematical formula will be determined.

Electronic auction may be conducted in several consecutive phases and may start no earlier than two days after sending invitation to bid under Paragraph 5 of this Article.

Electronic Auction in Case of Submission of Electronic Bid

Article 44

Where bids in public procurement procedure are submitted in electronic format, contracting authority may conduct electronic auction without any special invitation to bidders, immediately after the bids were opened and automatically ranked, on condition that it enables each bidder to access information on their current ranking and on the offered values in other bidders’ bids.

In its invitation to bid, contracting authority declares the intention to conduct electronic auction in the manner set forth in Paragraph 1 of this Article.

Transparency of Electronic Auction

Article 45

During the procedure of electronic auction, contracting authority is obliged to enable bidders’ insight into data on the basis of which they can at all times determine the order of submitted bids and number of bidders, but in such way so not to reveal identities of bidders.

Conclusion of Electronic Auction

Article 46

Contracting authority concludes electronic auction in one or more of the following ways:

1) by determining the exact date and hour of conclusion of electronic auction;
2) by ceasing to receive new prices or elements of the criterion, which satisfy requirements regarding minimal differences. Contracting authority clearly states in invitation to bid the time allowed to lapse between the submission of the last bid amendment and the conclusion of electronic auction;

3) by conclusion of the number of electronic auction phases set in invitation to bid.
