Attachment A to Appendix D
Determination of Purchase Prices

DA.1 Purchase according to Section D.2.1

The “A” Purchase Price shall be equal to ten Ringgit (RM10).

DA.2 Purchase according to Sections D2.2 and D.2.3

To determine the “B” Purchase Price, the following equation shall be used:

“B” Purchase Price = QR + SEC - SER - RS, provided that if it results in a negative number, the “B” Purchase Price shall be zero.

Where:

SEC = the sum of all Sponsors Gross Equity Contribution paid to the Feed-in Approval Holder prior to the Calculation Date.

SER = the sum of all Sponsors Gross Equity Repayment paid on or prior to the Calculation Date.

RS = the Retained Sum.

QR = the quarterly return on the SEC, calculated in accordance with the following formula:

$$QR = \sum_{n=1}^N [[(SEC_n - SER_n) \times (1 + X\%)^{(N-n)/4}] - [SEC_n - SER_n]]$$

Where:

SEC_n = (i) the sum of all Sponsors Gross Equity Contribution paid to the Feed-in Approval Holder within calendar quarter *n*, or

(ii) zero (0), if the cumulative sum of all Sponsors Gross Equity Contribution paid to the Feed-in Approval Holder in each of the full calendar quarters prior to (and including) calendar quarter *n* is greater than SEC.

SER_n = the sum of all Sponsors Gross Equity Repayment paid within calendar quarter *n*.

n = an index, from 1 through N, representing each of the full calendar quarters occurring since the Effective Date.

N = the aggregate number of full calendar quarters occurring between the Effective Date and the Calculation Date (both dates inclusive).

X = 11%

For this purpose, a calendar quarter means a period of three (3) months ending on 31 March, 30 June, 30 September and 31 December.
